Mr. Dennis Brennen- Spiritual Guidance

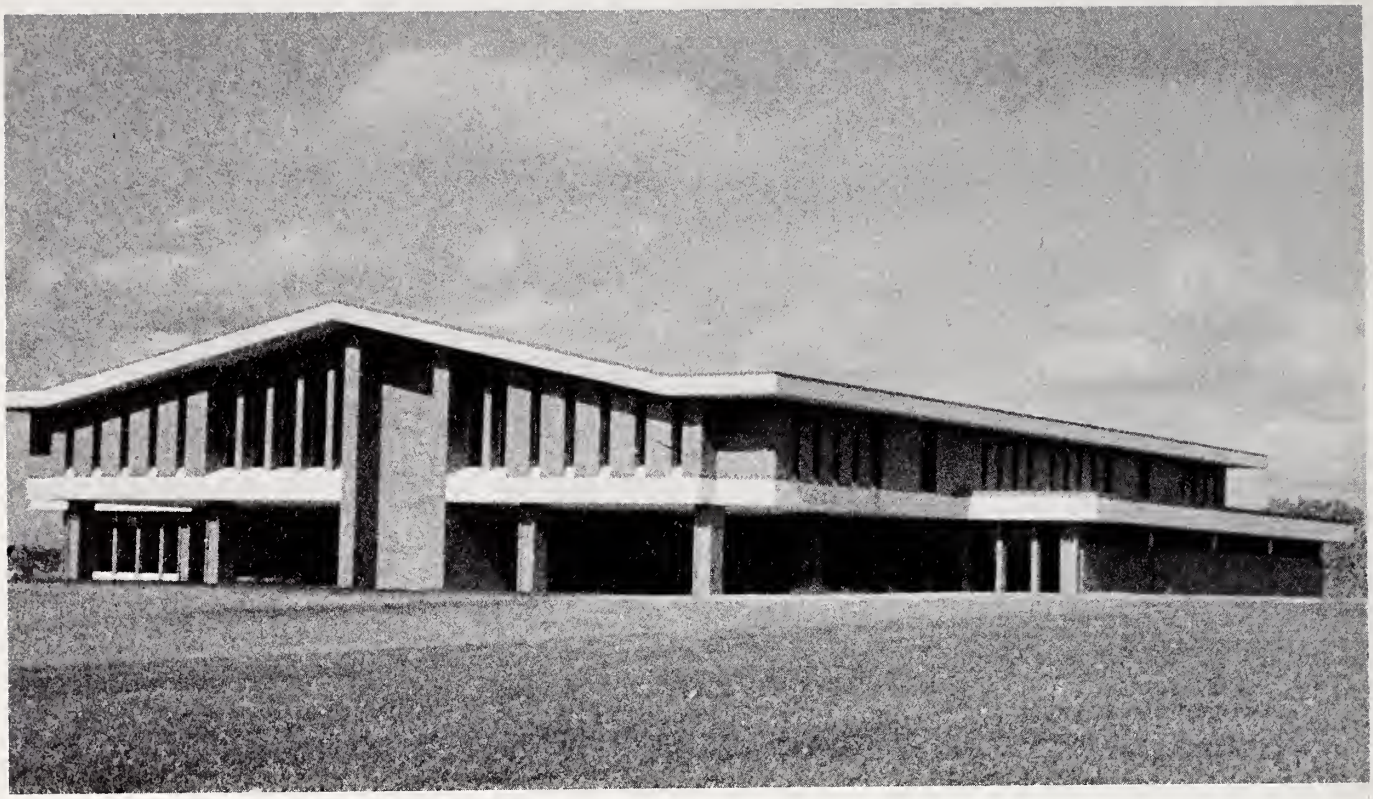
Bruce Bradley Burnside .... and a cast of thousands.

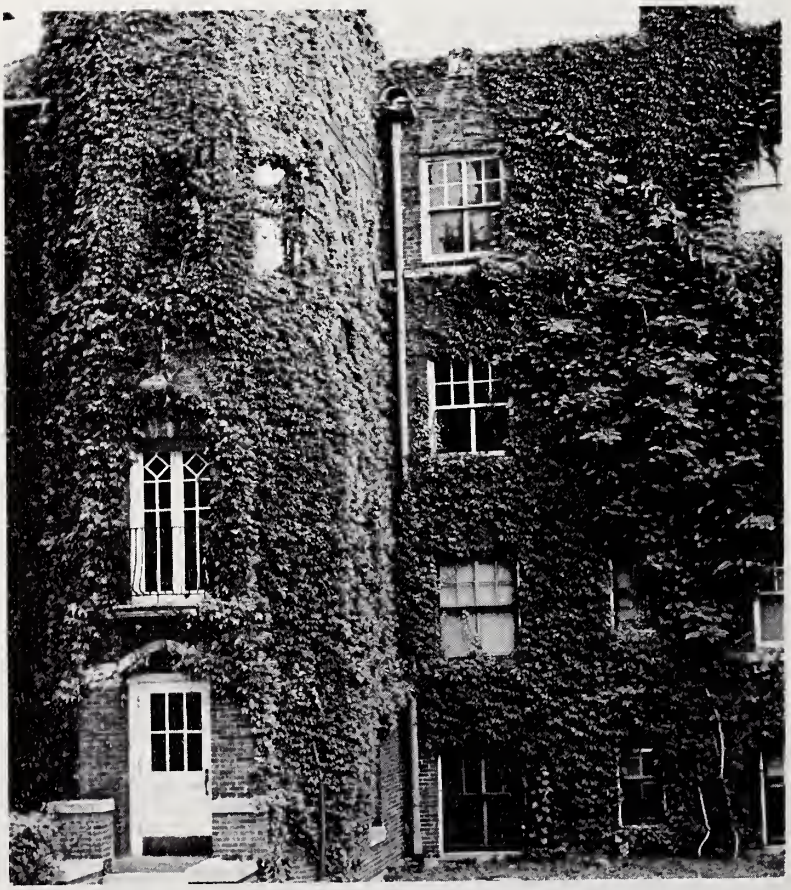
you are about to embark
on a journey
through a small, midwestern
liberal arts college.
strategically located
in the screw capital of america,
rockford illinois.
this college was named, originally enough,
rockford college.

you will meet friends,
you will meet enemies,
you will meet people
you have never seen before.
it is 1969.
have no fear ... these are strange times ....

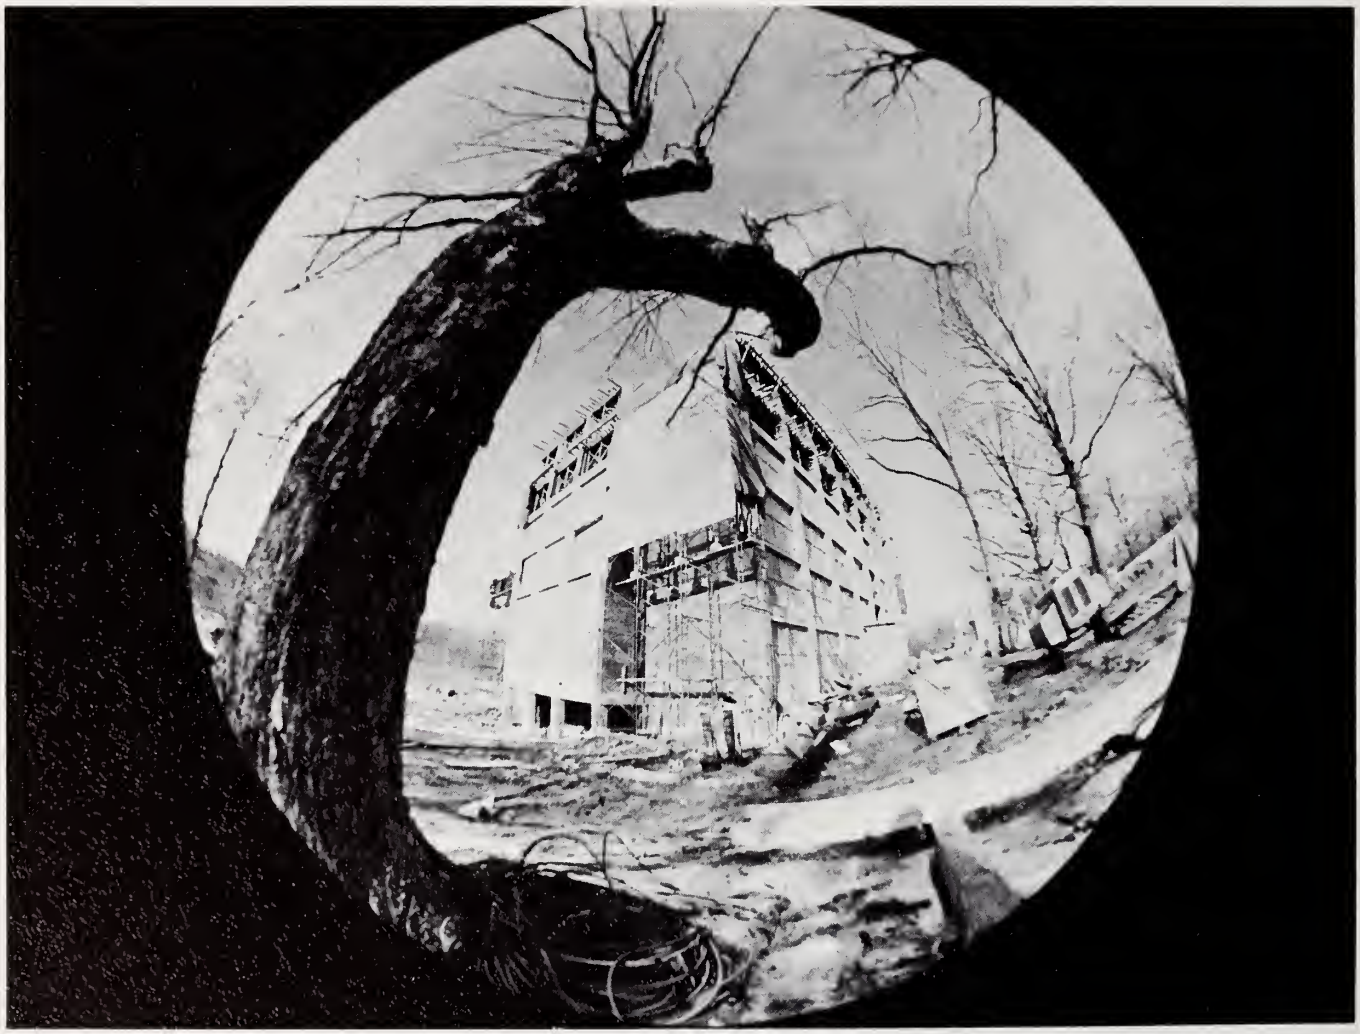
you are in good hands

come with us ....





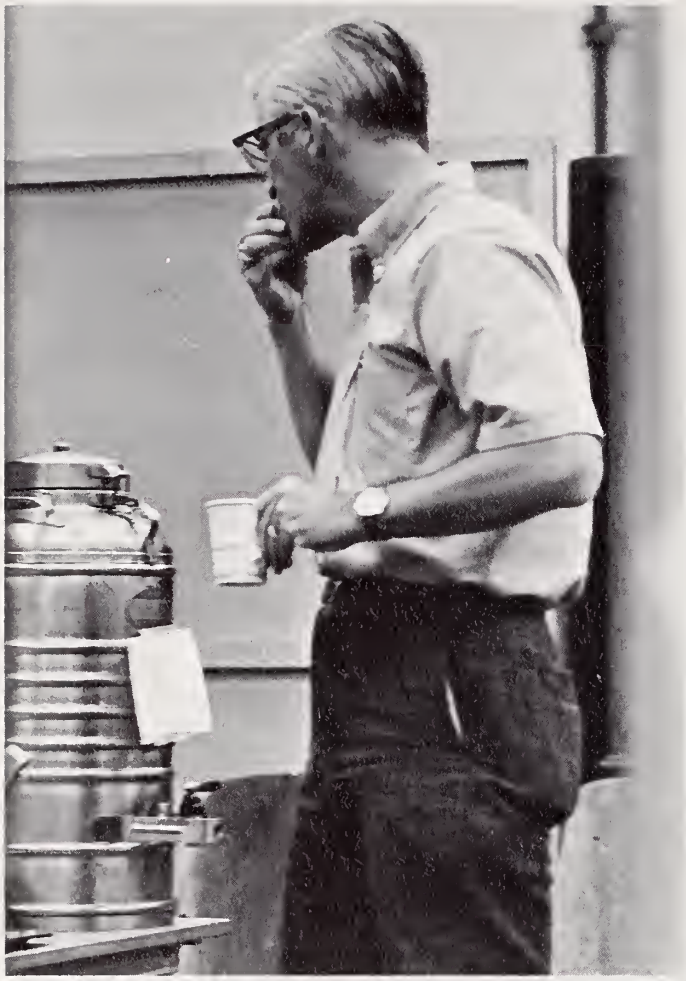
our campus is large
very large.
it used to be a cornfield ...
part of it still is.
immediately
you will notice the strange buildings ....
they look alike
and none are covered with ivy ....

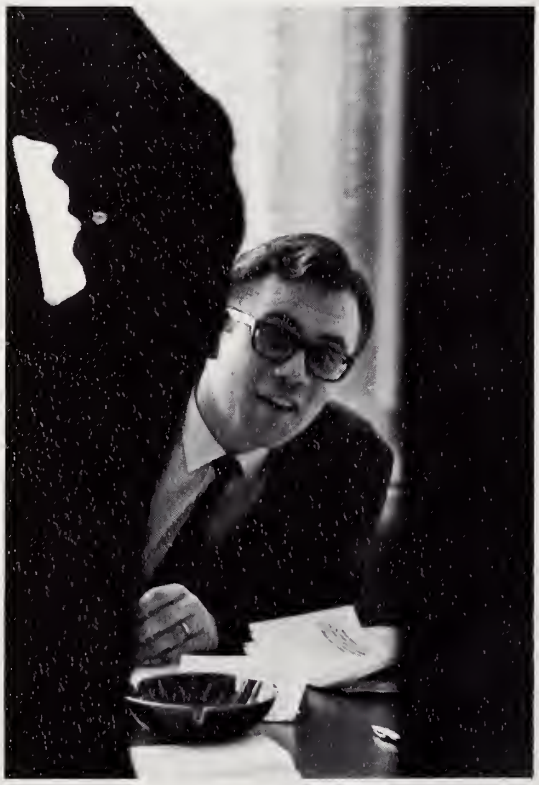


SHER MEMORIAL CHAPEL

but a college is more than buildings
the rest
is for learning

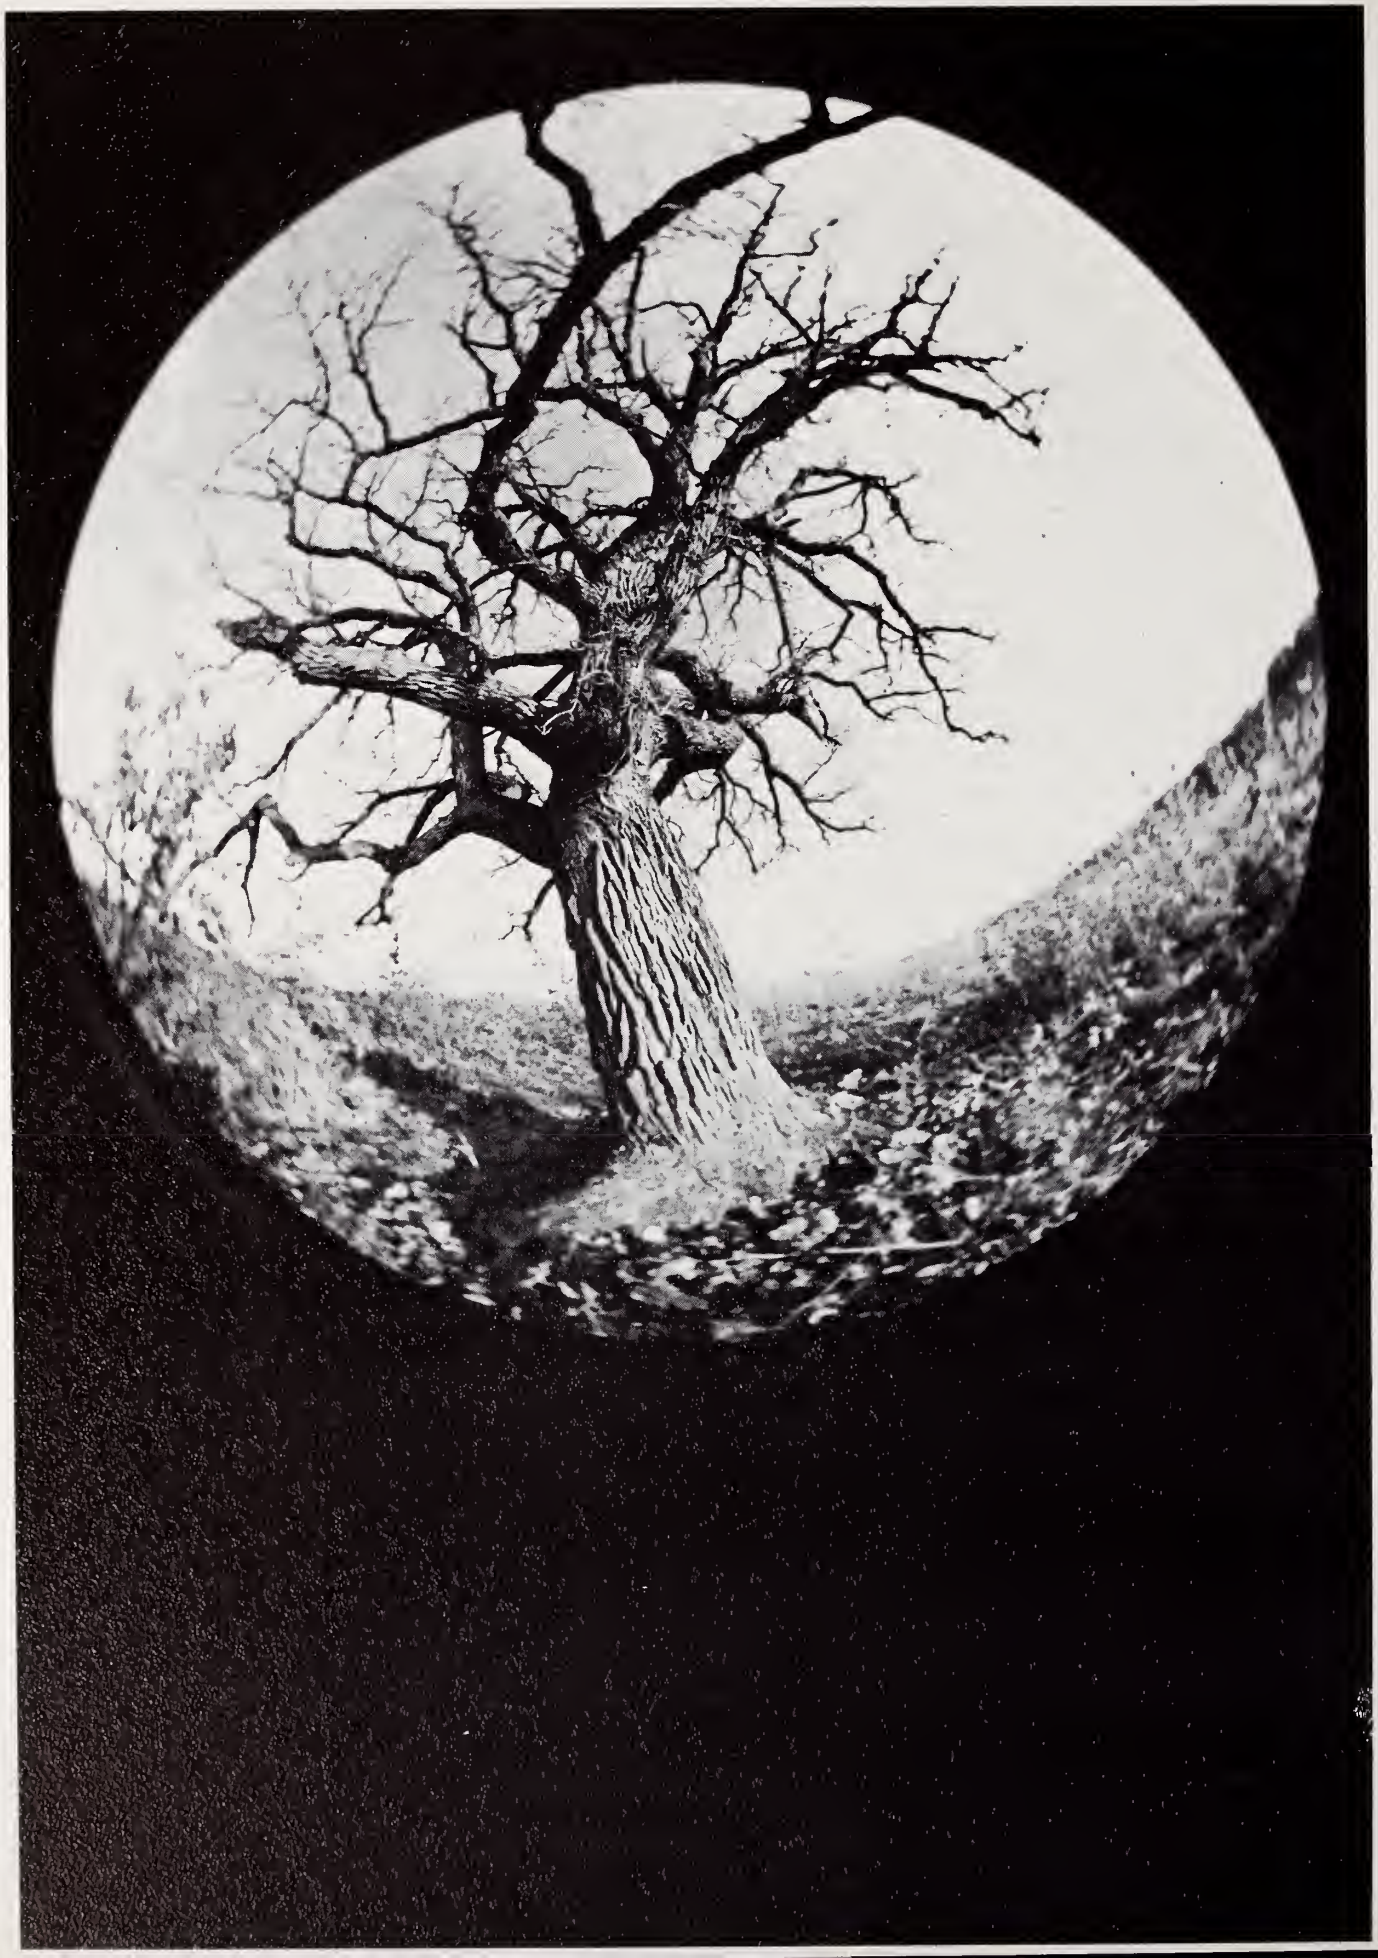
an r.c. education
is not
an everyday education
not yet anyway ....
the students
wouldn't allow .....





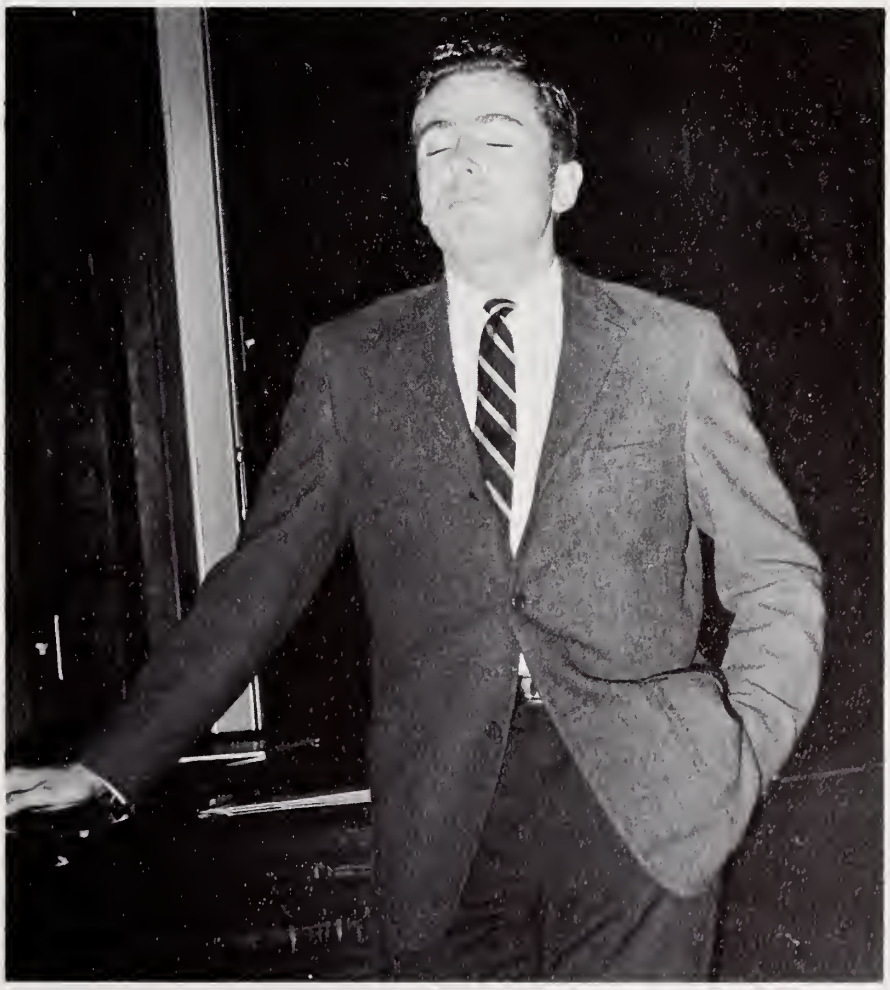
when a college
draws students
with the backgrounds
of rockford students
things can't be dull
this keeps rockford alive ....

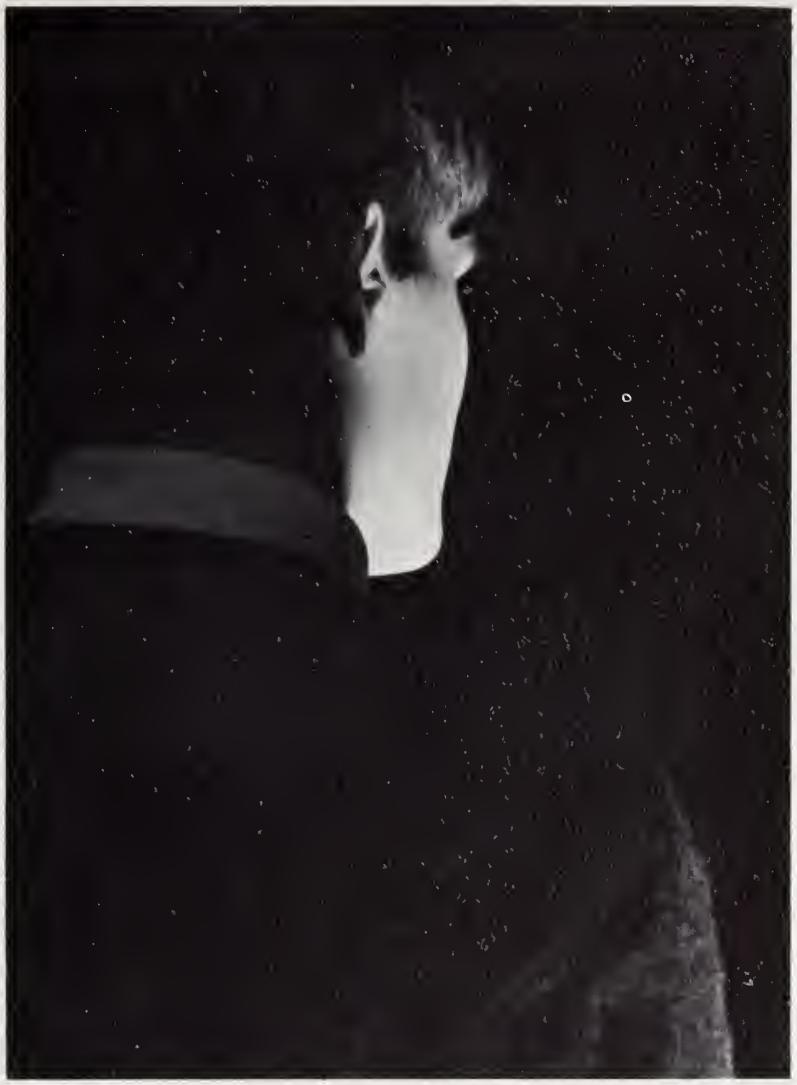
rockford is alive
contrary to popular opinion.
but the life is different
people at rockford college aren't
the socialite types
found at ivy league schools ...
these are real people ..
for better and/or worse ....
remember ...
it's a cornfield .....

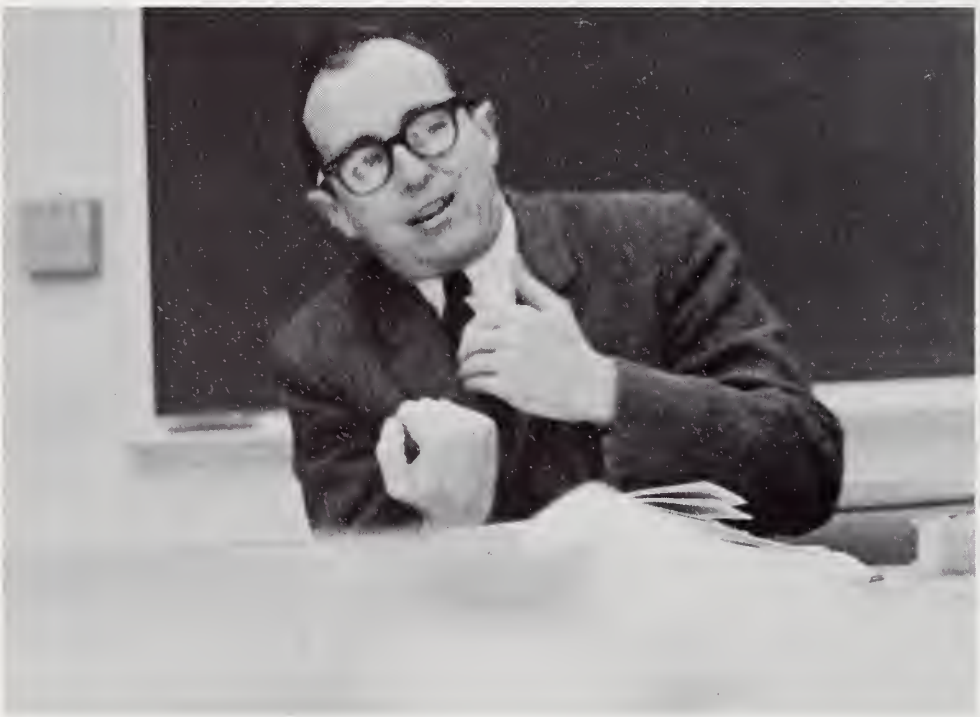


some of us call it autumn ....
others call it God .....

REGENTS

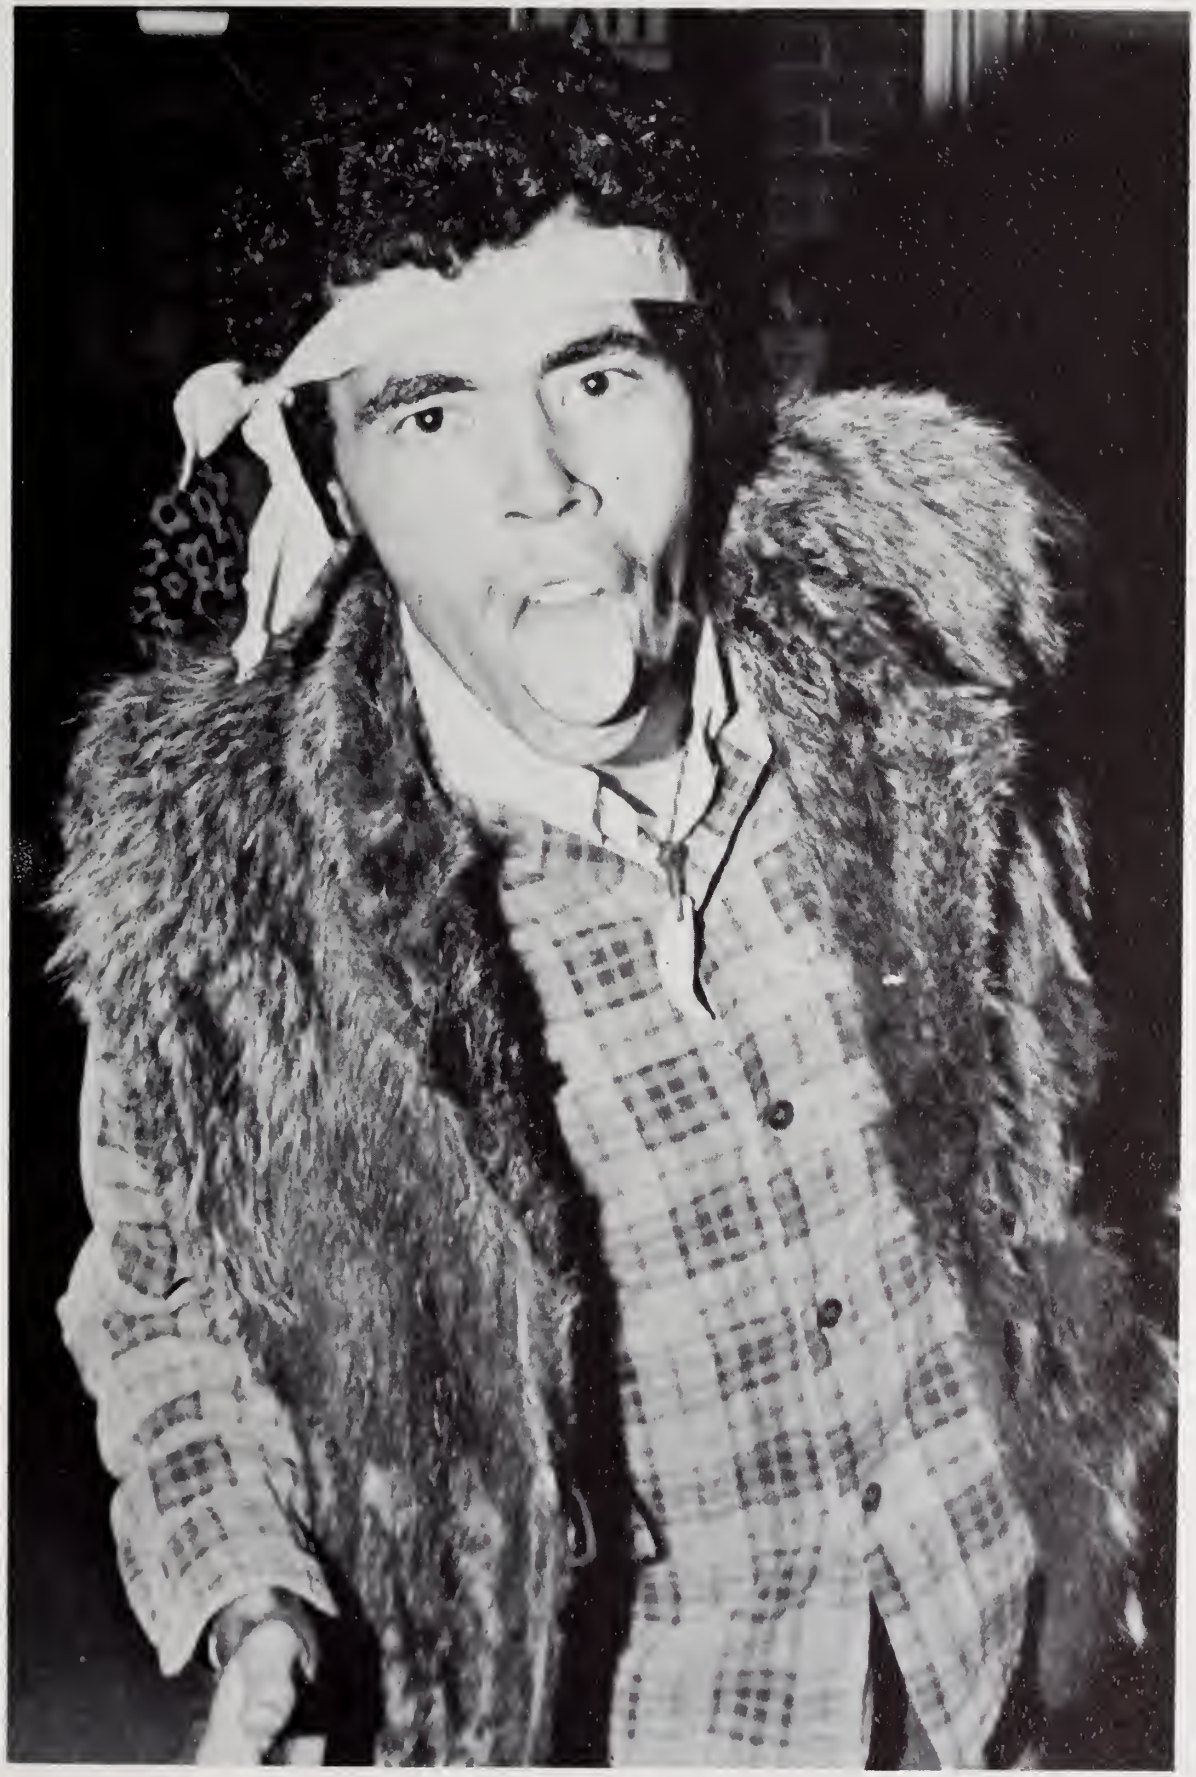


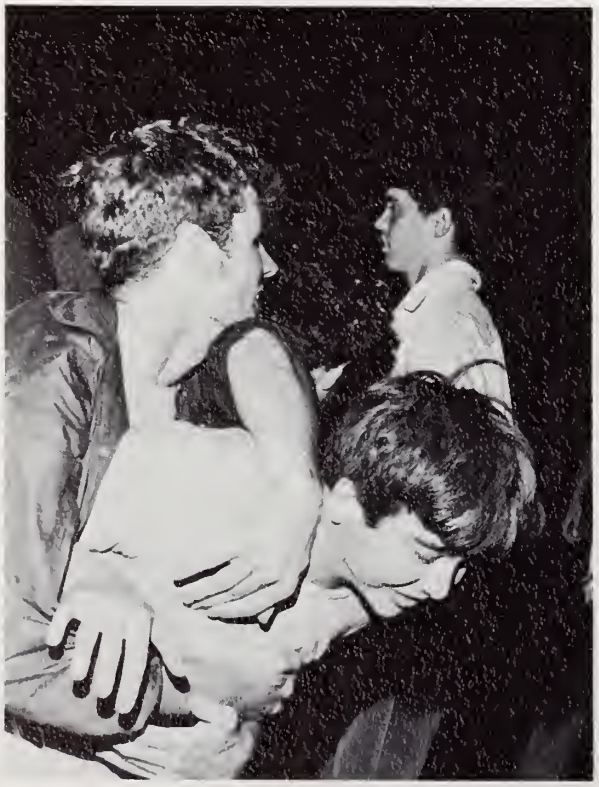


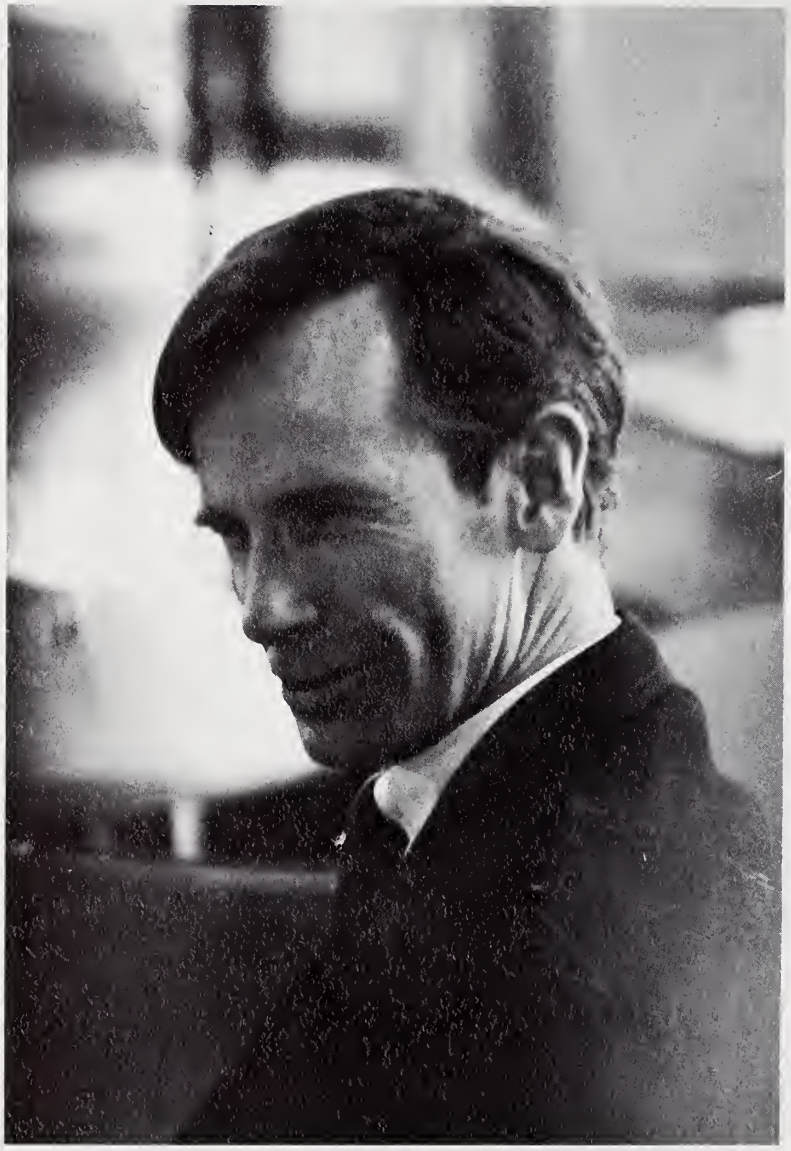


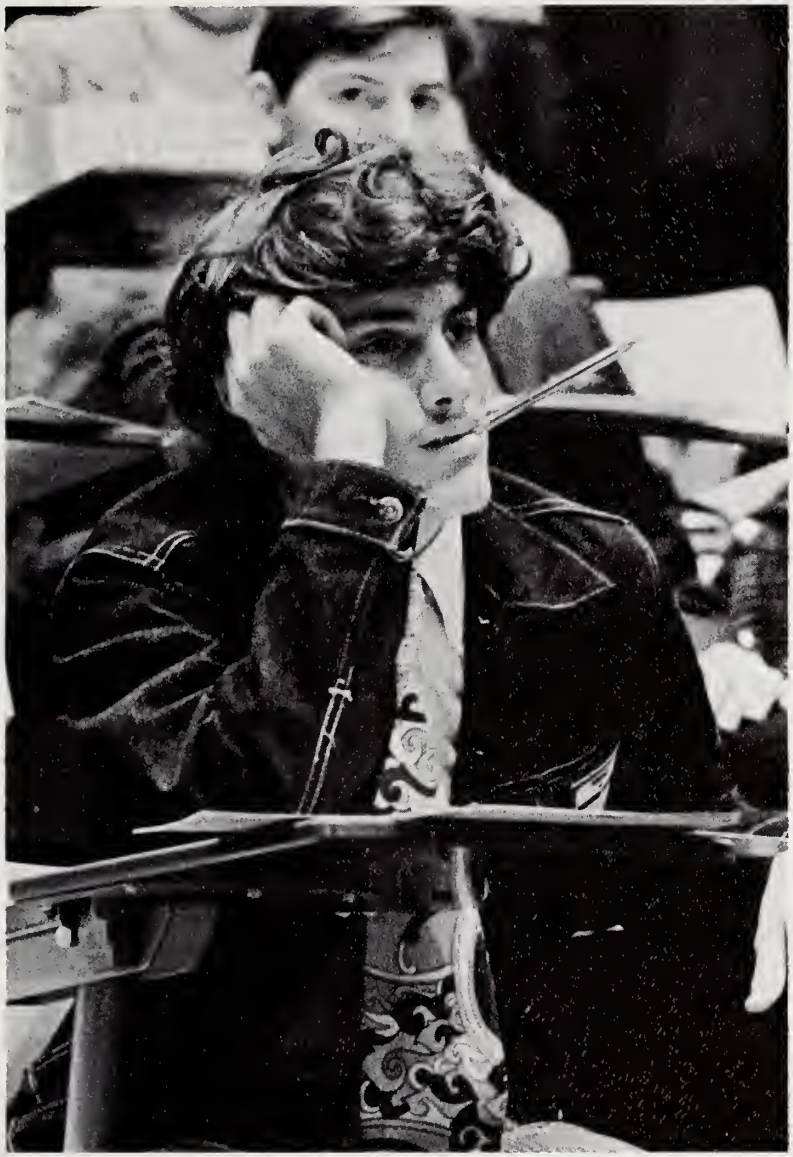
HEID FU FI DEL

Your roommate can't sleep in the dark?









we may achieve climate ....
but weather is thrust upon us ....

Principles

are the general or fundamental truths under which life is governed. In business, a jeweler's principles are especially important for he occupies a position of trust. One indication of his standards is the emblem below which indicates membership in the American Gem Society—an organization formed in 1934, and pledged to the vigilant protection of the buying public. We are proud to be a part of this select group.

Exploring the challenge of tomorrow . . . and the day after tomorrow.

Sundstrand Corporation is a multi-company organization, providing systems and components for application in the fields of defense, aerospace, metalworking, farm and construction machinery, heating, cooling, and air conditioning. Key to the company's dynamic growth has been consistent emphasis on intensive engineering—and a substantial investment in R&D. Sundstrand is now developing space power systems, underwater propulsion systems, vehicle transmissions, machining systems, and other products for the future. We would be pleased to talk about your tomorrow and ours . . . anytime!
